

Gestall T™

Digestive Aid for Food Intolerance Sufferers

More Great Things from the Enzyme Technology Leaders

Gestall T™ is a potent combination of proteolytic, amylolytic and lipolytic enzymes with herbs, amino acids and other important nutrients. Gestall T™ is specially designed using our exclusive two-phase tableting technique to meet the special digestive support needs of your patients.

Gestall T™ is a unique design based on our Gestall™ product. Developed in co-operation with a Nurse Practitioner in Pennsylvania, Gestall T™ is based on our potent and very popular Gestall™ digestive aid. Janice Betz, RN noticed that she was getting great results from Gestall™ but that she got significantly better results with her customers who had food intolerances and allergies when she added several other nutrients to the routine. She asked if it was possible to re-design Gestall™, adjusting the amounts of some nutrients and adding others.

Everyone was so impressed with the result that instead of a redesigned Gestall™, we thought this needed to be a stand-alone product for more specialized digestive needs. So, Gestall T™ was born.

Gestall T™ is designed for patients who have food intolerances and allergies. It uses our unique two-phase design; One phase for the stomach and one for the duodenum, based on where those nutrients are best utilized by the body. Gestall T™ is a proprietary blend of ingredients like L-Glycine, Ammonium Chloride (a buffered form of hydrochloric acid), Ginger Root, N-Acetyl-Cysteine and Chromium Picolinate. It has a VERY potent blend of digestive enzymes like α -Chymotrypsin, Pancreatin, Lactase, SOD, Catalase, Trypsin, Bromelain, Papain, Pepsin, Lipase and Ox Bile Extract.

No other formula contains the combination of enzymes, herbs and other support factors designed to improve and enhance digestion and relieve a number of the problems related to poor digestion.

Compare Gestall T™ with the digestive aids you are currently using. We know that you will be impressed with the results and so will your patients.

Available in 200 tablet sizes.

Gestall T™ has been designed to provide maximum possible support for people suffering from:

- | | |
|--------------------------------------|--|
| ▶ Gluten Allergies | ▶ Allergies (Food and Systemic) |
| ▶ Protein Intolerances | ▶ Chronic Diarrhea |
| ▶ Gas | ▶ Malabsorption |
| ▶ Bloating | ▶ Celiac Sprue |
| ▶ Poor Protein Digestion | ▶ Eczema |
| ▶ Poor Fat Digestion | ▶ Psoriasis |
| ▶ Poor Carbohydrate Digestion | ▶ Dermatitis |
| ▶ Gastritis | ▶ Rosacea |

Some of Rainrock Nutritionals' synergists for these formulas are:

Adrenal Force, Allergy Relief, Super B 100, Boro Cal, BoroCal-Mag, Fiber Form, Liverplex, Hepatoplex, Omnizyme®, Omnizyme Forte®, Multiglandplex, Osteo Forte, Pancreaplex, Nature Lax

Dramatic results are sometimes noted almost immediately when the right digestive aid is used according to directions. Remember that about 90% of individuals with gastric complaints exhibit symptoms commensurate with hypochlorhydria and about 10% with hyperchlorhydria. These products are designed so that one tablet taken about 10-20 minutes before a meal should suffice. In some people, two tablets may be required.
