

Albicanex™

Powerful Enzyme-Based Support For Candida And Yeast Overgrowth

So what is the best approach to yeast overgrowth? That is the question we asked ourselves while working on a design for a top-notch aid for physicians fighting candida and other yeasts. After much research and consultation we decided that a multi-faceted approach with an enzyme base was the best way. The result is a product we call **Albicanex™** and we believe that you will be very impressed with it.

Look closely at these ingredients and our design rationale then give **Albicanex™** a try.

Cellulase- A key enzyme in the battle against yeasts. Yeasts are plants and have a cell wall constructed mainly of cellulose. Cellulase hydrolyzes cellulose into oligosaccharides and destroys the integrity of the cell wall, making the cell susceptible to attack from defenses.

Trypsin- a pancreatic enzyme that has powerful proteolytic activity. Once the cell walls of yeast have been breached the internal proteins of the organism are then susceptible to the powerful activity of this protein destroyer

α-chymotrypsin- One of the most potent and long-lived proteolytic enzymes available. After most other enzymes have lost their potency, chymotrypsin is still working to catalyze the hydrolysis of protein. This makes it an ideal addition to the product. You won't find many yeast products with 6 mg of 1000 IU/g chymotrypsin in them.

Oregano Extract- Has been shown to have powerful antibiotic properties, and is especially useful against candida. In combination with enzymes which disable the yeast's frontline defense, a high volatile oil extract gives this supplement the firepower needed to deal with candidiasis outbreaks.

Pau D'Arco- Long in use as an anti-candida agent, it is also a powerful tool against fungus, virus and microbes. It enhances overall immune system function and provides the necessary ammunition for fighting yeast.

Grapefruit Seed Extract- This has been found to be a formidable weapon against candida and a host of other bad actors- fungal, viral, microbial. One of the most useful tools in the arsenal

Biotin- Candida is prevented from entering the mycelium or vegetative stage by the presence of large quantities of biotin. Yeast enter the tissues in the mycelium stage.

Copper- Copper is an important anti-candida agent. It enhances aerobic metabolism which disables candida. Those who have yeast problems have copper imbalances in virtually every case

Molybdenum- This important trace mineral is essential in breaking down the toxins issued from yeast colonies.

Zinc- Zinc is a vital mineral when fighting any infection. It is an important co-enzyme for several immune system enzymes. This is an absolutely vital immune system enhancement adjunct.

Currently, **Albicanex™** is packaged in 60 and 120 tablet size bottles.

List of Ingredients

Supplement Facts			
Serving Size: 1 Tablet			
Servings per Container: 60 or 120 Tablets			
Each Enterically Coated Tablet Contains:			
	Amount per Serving	% Daily Value*	
Biotin	1700 mcg	567	† %RDI Not Established *% Daily Values are based on a 2000 Calorie per day diet Recommendation: Two tablets 2 or 3 times per day or as otherwise directed Also Contains: Maltodextrin, Stearic Acid, Magnesium Stearate, Silicon Dioxide Distributed By: Rainrock Nutritionals Westerville OH 43081 877-204-1953
Copper	1 mg	50	
Molybdenum	70 mcg	93	
Zinc	20 mg	133	
Cellulase <small>(120000 cu/g)</small>	1000 mg	†	
α-Chymotrypsin <small>(1000 u/g)</small>	6 mg	†	
Trypsin <small>(5000 u/g)</small>	100 mg	†	
Oregano Extract <small>(1.75% volatile oils)</small>	400 mg	†	
Pau D'Arco	500 mg	†	
Grapefruit Seed Extract <small>(4:1)</small>	50 mg	†	

Albicanex™ is designed to provide additional nutritional support to your chosen treatment for the following:

- ▶ Candidiasis
 - ▶ Yeast Overgrowth
 - ▶ Cyclic Symptoms
 - ▶ General Malaise
- ▶ Depressed Immune System
 - ▶ Uncontrollable Carbohydrate Craving
 - ▶ Diverse Array Of Symptoms Too Numerous To List

Suggested Use Directions:

Use two tablets two or three times daily as a general guideline. Many respond well within this dosage but some may require less and some more to see the full effect. It is possible that some time may be required to notice maximum results depending on the individual. This is not a short term approach that will yield instant results. Yeast overgrowths are the result of long standing problems and take time and effort to resolve. Often, symptoms will become worse for some time before getting better. Fighting yeast requires a change in lifestyle, especially diet, for most people. It also requires direction from a health care professional experienced in treating for yeast overgrowths.

Some of Rainrock Nutritionals synergists for this formula are:

Adrenal Force, Chelation Complex, Co-Enzyme Q10 (capsules or sublingual tablets), DHEA, Echinacea, Hepatoplex, Liverplex, Lymph, SOD/Lipoic Acid Complex, Spleen, Omnizyme® or Omnizyme Forte®, Virucidal, Vitamin C, Vitamin E, Zinc-50, Xanthopein
